

ALLURE range solution

INSTALLATION ON SLOTTED SUPPORTS

- Provides an economical way of dealing with **vertical slats**
- Especially **adapted to sheet material**
- Suitable for use on site without **prior assessment**
- **Equally spaced slotted system** allows adjustment to substructure on site
- **Minimizes thickness of the overall system**
- Ease and speed of installing modules
- Compatible with installation of secondary horizontal substructure
- Joints free of any visible fixing elements
- Offers option of selecting the width of the horizontal recessed joints
- Offers a wide range of colours at the rear of vertical joints

The LATCHA® solution complies with requirements of the CSTB (code of practice for building works) depending on the material used and type of substrate.

ALLURE range solution

- 1 Substrate
- 2 Insulation
- 3 Right angle fixing bracket
- 4 Secondary substructure with openings
- 5 Metal or composite cladding
