

CERTIFICATE N° TF-01

When you contact a QB certified transformer, you are assured of a partner who :

- 1 Ensures, thanks to its certification, the validity of the Technical Specification on your achievement (depending on the configuration).

**An untransformed product by an approved recognized transformer,
cancels the validity of the Technical Specification.**
- 2 Provide its expertise of certified Transformers in order to adapt the architectural concepts in accordance with the scope of the Technical Specifications (or field of legislation).
- 3 Respect rigorous requirements specification related to transformation of Aluminum Composite panels.
 - Respect adherence to manufacturing tolerances.
 - Permanent control of the machining characteristics.
- 4 Commits on the planning to product delivery, compliance with the requirement specification related to the project....., during the contract review.
- 5 Directs the solutions to the best-suited Aluminum Composite product depending on technical and environmental constraints.
- 6 Ensures the traceability of materials implemented on the site. As part of Technical Specifications, marking into back of elements of the transformation date and the QB logo.
- 7 Clarify with you exchanges with supervising offices. Advices, adaptation, justification, design calculations.
- 8 Commits its quality assurance system, its process and its industrial facilities are controlled and audited each year by the CSTB.
- 9 Provides a comprehensive offer by integrating secondary substructure comply with Technical Specifications.
- 10 Provides a guarantee of having contracted insurance for products implemented under Technical Specifications. (RC insurance + EPERS).
- 11 Advises for the implementation on the site, thanks to the countless works carried out.
- 12 Achieves, through its integrated Design Office in connection with the CTSB and manufacturers, the complete studies (durability of meaningful system) including layouts, details and installation plans.
